

MEET MIKE MASCARO.

In 1997, Mike graduated with an Associate of Applied Science degree, after having already worked in information technology for years in the Bay Area.

In as little as three years of running his own company, he had become an information technology expert in the field of dentistry. In 2005 he joined the elite team of experts at Pact-One, realizing their core mission of honest service was a perfect match with his own. He integrated his team seamlessly, and has continued the tradition of raving fans ever since.

"We are not your computer-nut Uncle Phil or the Geek Squad. We are dental IT gurus. Our whole purpose is to be the very best, the most knowledgeable, the most honest dental technology experts in the country, to always be better, to always learn more and be able to provide for our clients," he says. "And what I know is that even if a client decides to enlist Uncle Phil, they eventually bring us in to get them back on track, producing and running their practice properly."

READ WHAT MIKE'S CLIENTS HAVE TO SAY.

"A colleague of mine referred me to Pact-One. Mike did a very thorough preliminary evaluation of our network, made recommendations with a philosophy of longevity and predictability as the foundation of the network. Actually, he was much more professional than other, previous experiences I've had with IT. We discussed options and the implementation was 'within normal limits.' Now we are spending virtually no time managing computer network issues. Our productivity has increased with the seamless integration and stability of our new network. It's hard to find a team that has the dedication, and more importantly, the integrity that Mike's team has. They are true 'yes men.' Sign up for the Platinum Service and you will never question whether or not you made the right decision." John Buzza, DDS

"We care only about being the very best at what we do. I love seeing the results, and look forward to what we will achieve."
