“Insider Tips To Make Your Business Run Faster, Easier And More Profitably”

What's New?

We are excited to announce our collaborative book, written along with 25 of Top Security Minds in the IT Industry, including our very own CEO, Dan Edwards.

Easy Prey will be available on Amazon.com beginning August 18, 2016.

The term “Easy Prey” aptly describes those businesses exposed to the illegal, immoral and illicit industry known as Cybercrime.

Unsuspecting and often times unwary businesses and their personnel are often taken in as easy prey by cyber-gangsters. Cybercrime, which replaced cybervandalism, is growing quickly and more sophisticated daily.

OPTIMIZING TECHNOLOGY

This monthly publication provided courtesy of Dan Edwards, CEO of Pact-One Solutions.

It's only natural that when you hear of a disaster you think it couldn't happen to you.

That's why, even though we're told constantly that we should diligently maintain a working backup recovery system because all our company's data could be lost in an instant, we tend to brush off the advice.

Yet disasters do happen when you least expect them, and they can happen to anyone. So to illustrate the importance of staying on top of your data recovery system, here are three tales of “data gone wrong.” After all, there's nothing quite like a good horror story to inspire action!

Toy Story 2: Gone!

One morning in 1998, the animators at Pixar Studios working on Toy Story 2 noticed that Woody's hat started disappearing. Then his boots... Then all of Woody – gone! Other characters started disappearing too.

A rogue command in their system had

Are You Betting The Farm Your Backups Are Safe?

started wiping out data. No problem, the team thought, as they pulled out the backups. Unfortunately, the backups were bad and only had data from 10 months ago.

Luckily, one of the project leaders who'd just had a baby had recently asked to have a copy of the film installed at her house. So they drove to her house and escorted her computer back to the studios “like an Egyptian Pharaoh.” And as we now know, Toy Story 2 was saved.

Moral: It's not enough to simply run backups. You need to periodically check to make sure the data is actually getting backed up and nothing is corrupted.

46,000 Insurance Customer Records: Lost!

In 2010, Zurich Insurance announced it had lost a backup tape containing confidential data from 46,000 customer records as it was being transferred from one site to

continued on pg. 2

Get More Free Tips, Tools and Services At Our Web Site: www.Pact-One.com

another. To make matters worse, it was later revealed that it took a full year for their headquarters to learn that the tape was missing.

While there was no evidence that the data had fallen into the wrong hands, it was not encrypted and therefore easily accessible by anyone in possession of the tape. The company was slapped with a £2.3 million fine from the British Financial Services Authority.

Moral: If your backups are physical, make sure they're transported and stored securely in a location away from your computer. And regardless of whether your backups are physical or in the cloud or both, make sure they are encrypted with high-level security.

Why MegaPetCo Closed Their Doors

The fast-growing set of chain stores MegaPetCo had refused to upgrade their IT system to one that could handle their needs.

One day a systems developer

accidentally programmed a query that wiped out their entire database. All of a sudden, operations ground to a halt; from sales to payroll to purchasing and reporting, everything had been tied into that one database. And no backup.

“Everything had been tied into that one database. And no backup.”

They tried to sue their ISP, but between recommendations to upgrade and failure to do so, the lawsuit was dropped. Three months later, MegaPetCo filed for bankruptcy.

Moral: Backups may seem like a low priority, or even an unnecessary expense. Yet surely there is data that if lost would cost your company dearly. And when you compare the cost of replacement to the relatively minor expense of keeping good backups, the choice is clear.

Why Take A Chance That Your Backups Are Safe?

Our FREE Data Recovery Audit Will Help You Know For Sure!

The effects of a data disaster run the

gamut from minor annoyance to a death knell for the organization it happens to. We don't want that for you.

That's why until September 1st, we're offering our complete audit, normally valued at \$297, free to all new and existing Pact-One customers located in one of our service areas.

At no charge, our data security specialist will come on-site and audit your current data backup and security procedures and determine whether your current system can guarantee you a fast, safe and full recovery of your data.

Depending on what we find, we'll either give you a clean bill of health or reveal gaps in your data backup system that could prove catastrophic.

Then, if appropriate, we'll provide you with an action plan for further securing your data.

Call **702-492-6105** TODAY and let's make sure your company isn't betting the farm on a flawed recovery system.

Easy Prey Will Be Available On Amazon.com Beginning August 18, 2016

“Easy Prey – How To Protect Your Business From Data Breach, Cybercrime & Employee Fraud.”

This book will help **PROTECT** your business from a number of cyber threats, regulatory action, scams and business-crippling disasters.

Buy the book on August 18th and we'll give you over \$640 in free IT consulting services, templates, resources and information.

See www.pact-one.com/easy-prey for more details.

Shiny New Gadget

A Great Night's Sleep In The Palm of Your Hand

The techno-geeks over at Hello Inc. have just released Sense, a device that helps you wake up feeling great.

A tad smaller than a baseball, this little sphere sits on your nightstand next to your bed and monitors conditions in your room while you sleep.

Things like temperature, humidity, light and sound in your bedroom are tracked, along with your body's slightest movements as you sleep.

It pairs with your smartphone so you can see patterns and change conditions in your room to get the best night's sleep possible.

Sense can play any number of soothing sounds to help you drift off to sleep. Then, when it's time to rise and shine, it gently wakes you up at the best time in your sleep cycle.

It's priced at \$129, and you can find it at hello.is and other online retailers.

5 Ways to Build Raving Fans

Marketing is about connecting with consumers.

Great marketing, though, is about transforming those consumers into fans, raving fans – people who feel loyalty, and feel invested in your business and its success. Here are some creative ways to start converting your customers into your biggest fans.

1. Have your clients do some of the work.

This isn't about being lazy; it's about involving your clients in a memorable experience. Build-A-Bear is the perfect example of this technique. Children receive many stuffed animals over the course of their childhoods, but none so special as the bear they build themselves, selecting the fabric and components. The consumer's investment in the experience cultivates loyalty, and their unique experience can't be duplicated anywhere else. Offer your clients a way to personalize their experience with you.

2. Reject clients.

It's human nature to want what you've been told you can't have. The more limited an item or service is, the more we value it, and if your customers feel like they have achieved something by managing to get your attention, or having earned the privilege of spending money with you, they'll give you a lifetime of loyalty. As long as your product meets or exceeds expectations, then making it clear that you're selective about who you do business with will make you more appealing.

3. Deny your own existence.

Though now a much more public item, the American Express Black Card was long the subject of curiosity. The company refused to confirm its

existence or answer any questions about what the card might offer. Now customers beg for an invitation to the Black Card, despite the ridiculously high annual fee. Think about it... Customers clamoring to spend money with you? Cultivate mystery and clients will seek you out.

4. Encourage tattoos.

Extreme? Maybe. Effective? Absolutely! Not only are folks who get logos tattooed on themselves acting as walking advertisements, they're also absolutely certain to be loyal customers. Encourage tattoos by creating a cool logo and cultivating a reputation that's unique and appealing. Is this practical? Two words: Harley-Davidson. For folks with Harley tattoos, the brand isn't just a commodity; it's a lifestyle.

6. Create your version of boot camp.

Organizations like fraternities or the military create cohesion and loyalty by putting new recruits through tests and challenges. Let your customers know that your business runs differently than others, that you will require work and dedication from them. They will realize they're part of a special group, and they'll feel invested in promoting your services. Providing code words and emblems of membership makes customers feel like they're one of the elite, special few who have made it through boot camp.

It's no secret that marketing today is radically different than it was even ten years ago. We have to work harder to promote our brands, but the potential upside is huge, because devoted, raving fans will take up your banner and do some of the work for you. Creating and nurturing these fans will reward your efforts for years to come.

Here are 3 ways LinkedIn can generate new business for you:

- 1) Above all, earn the ask. The more value you provide in the relationship, the more “right” you have to phone time, a free consultation or the opportunity to make your pitch.
 - 2) Build a sales funnel. Organize your contacts and planned interactions for best results. Recognize and engage with inbound warm leads. And remember, timing is everything!
 - 3) Target and engage your ideal prospects. LinkedIn’s search engine gives you direct access to over 450 million professionals in more than 200 countries. In minutes, you can build a hyper-targeted prospect list by job title, industry type and/or location. With just these few tactics, LinkedIn can become a powerful business-building ally.

Did you notice the day Windows became malware?

If malware is any piece of software that

gets into your computer through stealth means – even if it’s a premier operating system – then Windows 10 fits the definition. Microsoft has been very aggressively asserting its self-imposed deadline of July 29 for free upgrades from Windows 7 and 8.1. And if it hasn’t been yet, you may find your computer hijacked and converted into a Windows 10 machine – whether you give permission or not. By default, Windows 10 collects advertising and personal data. It changes your computer’s configuration. And if you try to stop the upgrade by clicking the X on its dialog box, it installs it anyway. Aw, c’mon, tell us that’s not malware!

Imagine owning the domain rights to Google.com – even for just 60 seconds...

When Babson College MBA student Sanmay Ved happened to notice the google.com domain up for sale, he figured why not

go ahead and try to buy it. To his huge surprise, the sale actually went through!

He had just purchased google.com for the princely sum of \$12.

It didn’t take Google long to become aware that something had gone horribly wrong – less than 60 seconds, in fact. They fired off an e-mail to Sanmay, telling him they’d cancelled his order and refunded his \$12. Since the purchase was made on Google Domains, it was lucky for Google. As an afterthought, Google sent Sanmay a little spiff for his cooperation: \$6,000.13, to be exact. If you squint, you might see that the number almost spells “Google.” Sanmay vouched to donate to a charity to help children in India and Google doubled the amount to \$12,000.

Customer Spotlight: Dr. Stephen Chenin and Dr. David Chenin

Chenin Orthodontics is the first practice in the state of Nevada to have two doctors who are Diplomates of the **American Board of Orthodontics**. Dr. Stephen Chenin and Dr. David Chenin were *both* selected as Favorite Orthodontists by *Green Valley Henderson* and *Beyond Magazine* readers and are among the top 1% of Invisalign® practitioners in North America who have achieved an exceptional level of Invisalign experience.

Chenin Orthodontics is a fun, interactive office where patients are family. They have provided dental care to the Las Vegas valley for over 55 years with over three decades of clinical orthodontic excellence enhanced by advanced orthodontic technology. Their research brought worldwide recognition and made the front cover of The Journal of Clinical Orthodontics for their development of 3D technology for improved patient care, helping doctors and patients achieve better results.

Chenin Orthodontics has been a Pact-One Client for over twelve years. Dr. David Chenin shares how passionate they are about advancing technology in the practice. *“In this digital era, patients expect providers to keep up with the latest technology and our patients deserve the best. Here at Chenin Orthodontics we stay at the top of IT advancement for diagnostics and patient care and Pact-One has been with us the whole journey. They advised us during our IT improvements and proactively brought things to our attention; keeping bad things from happening.”*
